Objective

QA Automation professional with 1+ year of experience in software testing, with hands-on experience in Java, Selenium WebDriver, Appium, TestNG, and API testing. Experienced in maintenance automation across web and mobile applications in the Healthcare & Life Sciences domain, with a focus on functional testing, regression testing, and automation framework development.

Experience

Jan 2026–Pres.

Programmer Analyst Trainee, Cognizant, Chennai

- Working as an Automation Tester in the Healthcare & Life Sciences domain, supporting maintenance testing across three enterprise web and mobile applications.
- Designed, maintained, and executed automated test cases using Java, Selenium WebDriver, Appium, and TestNG for web and mobile application workflows.
- Maintained existing automation scripts by handling application changes, execution exceptions, locator issues, and test failures.
- Optimized automation code to improve maintainability, execution reliability, and test execution efficiency while delivering assigned testing activities within timelines.
- Completed enterprise-level QA automation training covering Java, Selenium WebDriver, TestNG, Cucumber/Gherkin, API testing, and functional testing.

Aug–Dec 2025

Systems Engineer Trainee, Infosys, Mysuru

- Completed intensive enterprise-level technical training focusing on software development and testing lifecycles.
- Implemented core programming and backend fundamentals, including Core Java, C#, and LINQ.
- Gained foundational proficiency in automation testing by scripting test cases with Selenium and NUnit.

Technical Skills

Testing & QA

Selenium WebDriver, Appium Basics, TestNG, Cucumber (BDD), REST Assured, Postman, Apache POI, POM

Languages

Java, SQL

Automation

Web UI Automation, Mobile Automation, API Testing, Regression Testing, Maintenance Testing

Tools

Git, GitHub, Maven, DevOps Basics

Soft Skills

Problem Solving, Test Planning, Time Management, Active Listening

Key Projects

Java, AI, Gemini

API

Agentic QA Automation Framework

- Developed an agentic QA automation framework that generates executable TestNG test scripts from a test scenario, application URL, and selected testing type.
- Supports Web UI, API, and combined Web UI + API testing for automated application validation.
- Implemented self-healing automation to navigate application pages, identify locators, and dynamically recover from locator changes during test execution.
- Integrated Google Gemini API for application analysis, test generation, locator identification, and agentic test execution with up to 10 attempts per test step.

Java, Selenium

Demoblaze Hybrid Automation Framework

- Architected a hybrid framework for Demoblaze e-commerce to validate end-to-end checkout flows using Java, Selenium WebDriver, TestNG, and REST Assured.
- Integrated API testing to handle user creation, accelerating test speed while maintaining POM architecture.
- Implemented thread-safe parallel execution using ThreadLocal and configuration files for Data-Driven Testing.

Education

2021–2025

B.Tech (CGPA : 7.92), Computer Science & Engineering, VIT Chennai

Specialization in Cyber Physical Systems. Coursework: OOPs, DSA, DBMS, OS, IoT, Computer Networks, Engineering Mathematics.

2021

Class XII (87.6%), Aditya Academy, CBSE

Physics, Chemistry, Maths, Computer Science, English

2019

Class X (95.5%), Aditya Academy, CBSE

Science, Maths, Social Science, English, Bengali, Foundation of IT

Certifications

Jul 2026

Claude Certified Architect Foundations - Anthropic [🔗](#)

Oct 2025

Oracle Data Platform 2025 Certified Foundations Associate - Oracle [🔗](#)
